

ALDERLEAF
Wilderness College

Presents

Natural Building with Earth Bag

(also known as superadobe)

5-Day Hands On Workshop

Taught by experienced
natural builder Eli Adadow

Monday, Aug 2 at 9 a.m. -
Friday, Aug 6 at 5 p.m.

What you will learn:

Design, foundations, walls, framing, roof systems, thermal performance, strength and integrity, use of local materials, and tricks for building fast, sturdy structures—the skills you will need to create your own earth bag structures

Earth bag structure uses:

Homes, garden, tool and bike sheds, wine and root storage, play houses, emergency shelters, and more

Sustainability & self-reliance:

These inexpensive, easy-to-build, beautiful buildings have offered self-empowerment and real solutions to sustainability and homelessness around the world.

More information:

Visit our website for more information about this class and other Alderleaf programs for both wilderness skills and sustainable living. **Space is limited.**
